PhD in Physics – NNNN Cycle

Research Project

(Min. font size: 11pt, single line spacing, include references in section 6)

PART A

1 – Ph.D. candidate

Firstname Lastname

2 – Research project title

(Max. 200 characters, including spaces.)

Insert text...

3 – Keywords

(Min. 3, Max. 5)

Insert text...

4 – Research project abstract

(Max. 1500 characters, including spaces.)

The abstract should, at a glance, provide the reader with a clear understanding of the objectives of the research project and how they will be achieved. The abstract will be used as a short description of the research project in the evaluation. It must therefore be short and precise.

Insert text...

PART B

1 – General research framework and state of the art

(Max. 5000 characters, including spaces and excluding figures.)

Describe the scientific framework and the state of the art in the field relevant to the project.

Insert text... A first example of a numbered citation is provided here [1].

2 – Description of the project with identification of the role of the candidate

(Max. 15000 characters, including spaces and excluding figures.)

Concisely present the scientific proposal, describing the proposed work. Specify clearly the objectives of the project, in the context of the state of the art in the field. Indicate the results that the project aims to achieve, the methodologies, and the advancements with respect to the state of the art.

Insert text... Methods based on reproducible scientific workflows can be introduced with a second example citation [2].

Describe key intermediate goals, when they are supposed to be achieved, the proposed criteria for verification and the individual contribution of the candidate.

Insert text...

Indicate how and why the proposed work is important for the research field, from the scientific point of view, and for possible application potentialities. If any, specify particularly challenging or unconventional aspects of the proposal, including multi- or inter-disciplinary aspects and possible social and/or economic impact.

Insert text... A book reference can be cited in the same way [3].

3 – Concise bibliography

(Max. 1200 characters including spaces)
